ABOUT ME

Highly skilled and experienced Software Engineer with a deep background in cybersecurity. Proven record in leading engineering teams, hardening production architectures, and delivering mission-critical software solutions on schedule.

TECHNICAL SKILLS

Node.js NestJS Python
Java C++ PostgreSQL
Docker Cybersecurity
Penetration Testing
Code Reviews REST APIs
Linux / Bash

EDUCATION

B.S. in Computer Science

New York University

2007 – 2011 | Graduated with Honors

High School Diploma

Washington Irving High School

Graduated 2007

LANGUAGES

English Native
German Professional
Spanish Intermediate

WORK EXPERIENCE

Senior Software Engineer

Jan 2015 – Dec 2020

AllSafe Cybersecurity – New York, NY

- Led an engineering team building cybersecurity solutions, secure microservices, and identity management gateways.
- Implemented defensive coding protocols, continuous vulnerability scanning, and static code analysis pipelines.
- Conducted regular code audits, security reviews, and automated integration tests for enterprise client systems.
- Collaborated closely with enterprise clients to determine security baselines and ensure compliance with strict industry standards.

Software Engineer

Jan 2012 – Dec 2014

E Corp – New York, NY

- Engineered and maintained mission-critical distributed software systems handling heavy daily transaction volume.
- Partnered with cross-functional teams in an Agile environment to deliver core software milestones ahead of deadlines.
- Identified, isolated, and resolved complex architectural bottlenecks and backend defects.
- Constructed end-to-end unit and integration test suites, increasing regression test coverage to 92%.

HIGHLIGHTED PROJECTS

Automated Threat Detection & Analysis Engine

Architected a microservice in Node.js and Python to ingest network traffic and detect abnormal security events in near real-time.

Resilient Secure API Gateway

Containerized REST API proxy featuring strict rate limiting, JWT token validation, and encrypted payload parsing built with NestJS and Docker.
